BTG - THE STORY BEHIND „BACK-TO-GERMANY“

The workshop trolleys manufactured by **KRAFTWERK in Germany** are characterised by a **uniform concept** from the **inexpensive entry-level model** to the **high-end professional model**, to high-end professional use.

We realise our idea of multifunctionality and sustainability in that many of our high-quality components can be used for all three lines (LT, BT and PT) as spare parts. Likewise, each component can be replaced in case of damage, which contributes to the reduction of waste.

In this context, **our wide range of tool inserts can be combined as desired in all workshop trolleys**. No matter whether for the do-it-yourself, for professional use or for specialised industry tools.

Thanks to our own production and the short supply chain, we can also offer you customised adaptations for larger quantities promptly and at a fair price.
