## CHARGING PROCESS

---

To charge the lamp, remove the rubber cap from the hollow plug socket on the rear of the lamp and insert the round plug of the AC/DC power supply. Then connect the AC/DC power supply to a mains socket.

When indicator on charger is red the lamp is charging.

When indicator on charger is green the lamp is fully charged.

Fully recharge the lamp until indicator on charger turns green before first use.

The battery should only be charged with the charger supplied by the manufacturer. To avoid damage, please do not use any other chargers.

When not in use, the charger must be unplugged from the outlet.

Keep the lamp in a dry place away from direct sunlight. The lamp must be protected against high humidity and water.

## WARNING!

---

Avoid looking directly into the beam, as it will dazzle.

Don't use the lamp near open flames.

Do not disassemble.

Lamp gets hot after long use! Cool down the lamp before touch it.

If lamp will be stored for one month or more, please fully charge it prior to storage.

Don't leave battery flats, otherwise it could be over discharged and may NOT be able to be reused.

The battery cannot be replaced.

The battery must be removed from the appliance before it is scrapped.

The appliance must be disconnected from the supply mains when removing the battery.

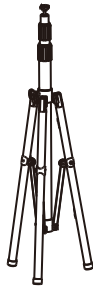

The battery is to be disposed safety.

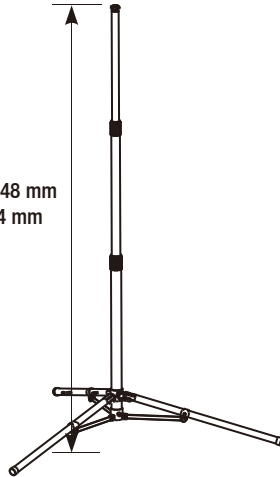

**NOTE:** Before disposing of damaged goods, check with your state Environmental Protection Agency to find out about special restrictions on the disposal of the lamp and batteries or return them to a certified service center for recycling.
